

Requirements

Black Reunion is a tribute band.

This means to create the illusion of an original Black Sabbath show.

To achieve this at an event the following requirements apply:

There should be an appropriate stage (min. 8×4 m) with suitable PA-, monitor-, lighting system, a drum raiser (3×2 meters), a possibility to attach a back drop banner (5×3 or 8×4 meters) and a local sound engineer.

The volume of the music shall be accordingly (105 dB FOH(??))

The stage must be accessible through the backstage area without affecting the audience

and should be accessible barrier-free from the tour bus for setting and dismounting the gears.

If several bands are at the location, the backlines of those are to be placed during the break in the way to provide sufficient space for own gears and moving.

The band plays a show of appr. 100 minutes without breaks and performs using popcorn buckets and water pistols, as the original but on a smaller scale.

If a rough estimate suggests no less than 100 people and if the above mentioned requirements are met, nothing stands in the way of a fat Black Sabbath tribute concert.
